

**Ref.: Steam valve gasket** **PART # 36.301.008**

In order to grant a better sealing of the above mentioned gasket and optimise its working condition with regards to the new steam valve, we inform you that from the month of September the gasket will be softer than the former ones. The part number will not change

**Ref.: 2 way solenoid valve for economiser PART # 34.040.104 # 34.040.105 # 34.404.106**

The solenoid valves applied to the economiser had a rubber seal. Following up on your reports about leaking from the water spout, we are going to supply valves with a Viton seal; starting with our October production run. It will grant a better seal, even with some scale build up around the plunger & seat. It also helps to self clean the surface, while in use. The new component will keep the same part number.

**Ref.: Classe 10 Logos**

We inform you that the program enabling download from a PC, allows for personalized logos for Classe 10 SDE Display Models only. It is now possible to create a logo by using the program <<Paint>> included in existing Windows software. It is also possible to receive our program by e-mail, but you will also need a cable to connect the PC to the CPU board of the machine. (Make your request to : [coffee@agt.net](mailto:coffee@agt.net) )

The cable is available from our spare parts department, part N. 10.110.429 , list price is \$30.00 CDN.

**Ref.: New Group body**

Starting today the production of models Classe 10 SDE and S will be equipped with a new group, with a build-in infusion chamber. This new feature will provide a better brew, so even coffees which require more infusion time will become tastier, enabling the group to generate better crema. We also are informing you that the standard gigneur O 0,7 mm. (fitted before the injectors in the cold position) will be now fitted on the group itself (in the hot position) in order to let the infusion chamber refill slowly and grant a longer contact between the hot water and the coffee grounds.

Please do not hesitate to contact the Rancilio Service Departement or your area Manager for any information you may need.

Sincerely yours  
Massimo Martellato  
Rancilio Service Dept.
